

Clocks & Picture Frames

Picture Frame Easel Backs

These black matboard easel backs are the easiest, quickest way to stand your picture frames! Extra long folding leg to correctly stand your finished photo frame. Hold in place with $\frac{1}{8}$ " brass 'U' came, to save hours of fabricating a hinged standing leg. Give your picture frames a more finished, professional look.

Mix & Match Easel Backs for Quantity Discount!

Light Box

Finally, an inexpensive and compact light box for tracing patterns, selecting glass colors, or as a lighted scoring table! Translucent 10" x 12" white plastic top and a bright fluorescent bulb. The portable Light Tracer is strong enough to draw and score glass on. Box is made of stainless steel. Made in USA. One year warranty.

#1021

Little Notcher

As seen on TV with Vicki Payne, the *Little Notcher* quickly and neatly notches brass channel to trim the edges of jewelry boxes, picture frames and stained glass panels. Just slip the channel into the adjustable slot and push down on the handle to cut a neat 90° notch in $\frac{1}{8}$ " brass or zinc channel (see drawing). Then bend the channel around your corners in a perfect right angle! Complete with allen wrench and instructions.

#790

Brass Channel

Used around box tops for added strength or to frame small stained glass panels. Perfect for holding photos and easel backs behind picture frames.

#716 Solid $\frac{1}{8}$ " x 36" long

NOTE: Add a \$6. boxing charge to ship a minimum of 12 pieces of solid brass channel in 36" lengths.

Brass Channel Bundle

24 pieces of $\frac{1}{8}$ " brass channel cut to 18" lengths, with no boxing charge.

#716B

Oak Pedestal Clock Kit

Create this beautiful 10" tall clock that stands on its own oak base. The kit contains 9 full size patterns, oak base, elegant 5" brass clock face, accurate quartz movement and complete assembly instructions. Add Cord & Socket set (#4000) to backlight your clock!

#8659

Brass Clock Faces

An elegant finishing touch for any stained glass clock. Classic old world European style faces. Each size comes with a set of black hands.

#753 5" Dia.

#737 7" Dia.

for clock patterns

12" Pendulum Clock Movement

Quartz movement keeps excellent time for use in stained glass clocks. Runs for a year on one 'AA' battery (not included). Complete with hands and 12" long brass pendulum bob.

#730

Mini Quartz Clock Movement

An excellent time keeper in a compact size. Runs on one 'AA' battery (not included). Complete with hands.

#735

Porta-Trace Projector

The Porta-Trace Projector enlarges any image up to ten times the original size. Perfect for enlarging scale drawings up to full size window patterns. 200 mm optical quality lens for sharp enlargements. The copy size is 5" x 5". Larger originals can be projected in sections. An important tool for designing stained glass windows.

#PROJECT

#710 Pattern Paper (not shown)

24" x 36" stiff paper for cutting patterns. Minimum mail order is 12 pc.

#712 Carbon Paper (not shown)

23" x 35" large size carbon for transferring drawings to pattern paper.

Glass Marking Pens & Pencil

Fine line markers for tracing patterns onto glass. Use the white pencil for tracing pattern lines onto dark glass. The gold and white pens will not rub off glass when dry. Great for use with a wet glass grinder or bandsaw! Use the gold pen to touch up your solder joints on brass came.
