

# Kokomo Glass

## Purchasing Stained Glass

Always purchase enough glass at the beginning of your stained glass project to complete it! Glass colors, like dye lots of fabric, can change from one shipment to the next, and you may not find exactly the same color match if you need more glass. In addition, glass manufacturers produce some colors as seldom as once a year. *The colors printed here can only be an approximation of the actual glass color.*

### Shipping Glass By UPS

Glass for UPS shipment is cut to fit one of our specially designed, heavy duty glass boxes. Glass colors may be assorted. There is a \$7. boxing charge for a small glass box that will hold up to 12 pieces, 12" x 12" (12 sq. ft. total). **MINIMUM of 6 small pieces.** 5 pieces or less may be cut in half for shipping. There is a \$10. boxing charge for a large shipping box that will hold up to 12 large size cut sheets (32 sq. ft. total). **A MINIMUM of 7 large glass pieces must be ordered to ship a large glass box because of UPS weight requirements.** Small and large glass sheets cannot be mixed in the same box. Manufacturer stock size sheets will occasionally vary in size. If necessary we will adjust your order slightly to the current size sheets.

### Common Stained Glass Descriptions

**Antique** – Glass produced in the antique manner, whereby a glass worker individually hand blows and rolls each sheet. A process, virtually unchanged since the middle ages, results in brilliant transparent glass, with many striations and imperfections. The introduction of mechanized procedures results in glass known as semi-antique, new antique, or Artique® glass.

**Baroque™** – Unique, bold swirling color patterns, similar to antique creamy glass. Usually manufactured with cathedral colors, but may also contain swirls of white opal glass.

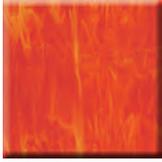

**Cathedral** – Usually transparent glass of one color. Various patterns may be rolled onto the glass during its manufacture to diffuse light coming through the glass. Common patterns include hammered, granite, ripple, seedy, double rolled, and rough rolled.

**Glue Chip** – A surface gluing technique on clear cathedral glass. As the glue dries and shrinks, it pulls chips of glass off the surface, creating the unique Jack Frost fern-like pattern.

**Iridized** – Metallic salts applied to opalescent or cathedral glass, to create vivid mother-of-pearl colors reflecting off the glass surface.

**Opalescent** – One or more colors mixed with opal white glass to produce varying degrees of opacity. Rolled by machine or hand rolled to produce glass of uniform thickness. One sheet may contain as many as five colors. Wispy opals have light, feathery streaks of white opal.

**Waterglass®** – Cathedral glass with a unique and beautiful surface texture, which creates the effect of shimmering rippled water.

### Kokomo Glass

Founded in 1888, Kokomo is the oldest American art glass manufacturer, with documented sales to Louis Comfort Tiffany at the turn of the century. Many of the same colors are still produced today, making Kokomo the perfect glass for antique repairs and reproductions!

Large box size for UPS: 16" x 18" (2.0 sq. ft.)  
Small box size for UPS: 10½" x 14" (1.0 sq. ft.)
