

Glass Cutters

The Art of Cutting DVD

Learn to score and break glass like a pro! Find this and other helpful videos in our DVD section.

#DVD12

Choose The Glass Cutter That's Right For You!

'Cutting' glass really means scoring glass on a line where you want it to break. Choose the glass cutter below that's the best one for you, comparing the benefits you want. Remember that a carbide wheel will outlast regular steel wheels by ten times or more, and all cutting wheels should be frequently lubricated in cutting oil. Steel wheel cutters are inexpensive, but will dull quickly.

Toyo Comfort Grip Supercutter

This popular Toyo Supercutter has a slim oil reservoir handle, that fits your hand comfortably for miles of scoring!

#TC1

Toyo Pistol Grip Supercutter

The standard of the industry for comfortable fatigue-free glass cutting. Large, comfortable oil reservoir handle produces greater scoring leverage with less effort. Patented system provides a smoother oil flow and positive oil shut-off..

#TC6

Toyo Thomas-Grip Supercutter

The Thomas-Grip Supercutter is an automatic oil-feed cutter that features a unique, ergonomically designed handle. The barrel is topped with a saddle that fits between thumb and index finger, creating a three-point grip that ensures precise control.

#TC9

Toyo Replacement Pattern Head

Original carbide replacement wheel for all Toyo self-oiling SuperCutters.

#TC10

Toyo Cutting Oil

A synthetic lubricant specially formulated for all glass cutters. 4 oz.

#524

Toyo Tap Wheel Supercutter

The four-position saddle handle fits between your thumb and index finger. Comfortably hold your glass cutter like a pencil, while the unique 'tap' wheel creates a deeper score for cutting harder glass.

#TC21
