

Soldering Tools

Soldering Iron Safety Stand

Keep your hot iron safely off your table in this heavy coiled wire cage. Stand also has a convenient sponge for cleaning tips while soldering. Will hold all popular 80 to 100 watt irons.

#SP602

Soldering Iron Heat Controller

Solid-state unit regulates soldering iron temperature for better control of solder beading. Prolongs tip and iron life by preventing overheating. Use with any iron.

#3025

Mika Soldering Iron Controller

The controller helps to create smooth solder seams on all your copper foil projects. On lead came construction dial in the exact temperature you need to eliminate melting your lead came when soldering joints..

#MTC1000

Never-Rust Bronze Wool

Never use steel wool again! Fine bronze wool that will not rust and fall apart. Clean soldering tips and remove oxidation or patina. Bronze wool is even solderable! Three long-lasting pads.

#9411

Soldering Iron Tip Cleaner

Heat resistant bakelite tray and sponge, which is kept wet to remove oxidation from iron plated soldering tips

#4500

Replacement Sponge

#4510

Anti-Seize

A common problem with any soldering iron is the tip or tightening screw 'freezing' into the shaft. A thin coating of anti-seize on these parts before they corrode, allows easy removal when necessary.

#3801

Keep Soldering Tips Clean

1/2 lb. block of sal-ammoniac will last a long time! Just rub hot soldering tip on the block to instantly remove oxidation build-up.

#3035

E-Z Flux Pen

All purpose zinc chloride flux in a convenient marker pen. Put flux exactly where you want it, while reducing fumes and clean-up time.

#EZ4

The Panel Clamp Is Your Third Hand!

This is the helping hand we need when working on the edge! Use the *Panel Clamp* when soldering on ball chain, wire, hang-up rings, brass edging, or to hold 2 or more pieces of glass together for laminating. The list of uses goes on and on. Heavy, solid oak construction. 16" long.

#3516

Soldering Fume Extractor

Give yourself a safer soldering environment by trapping solder fumes in this fan-drawn canister with replaceable activated charcoal filters. The lightweight, 10" tall Fume Extractor is designed to be placed right on your project being soldered.

#217960

Replacement Filters - 3 pack

#217961R

Hakko Brass Coil Tip Cleaner

Unique non-abrasive brass wool coils extend the life of any soldering tip. Will not cool your tip as when using a wet sponge, allowing you to continue working immediately after every wipe.

#599

Hakko Brass Coil Tip Refill

Brass coil refill for Tip Cleaner (#599).

#599R

Protective Soldering Mat

2-layer heavy grey rubber mat, cleans easily and will not burn, to protect your worktable when soldering. Just wipe clean of flux residue. 24" x 15" size.

#2981

Solder Remover

Pure copper braided wick draws up melted solder with a hot iron. Great for repair work and soldering mistakes!

#3044

'U' Bright Hobby Came, 1/16"

Make your ring kits and suncatchers gleam with *BRIGHT SILVER* lead-free hobby came that will not oxidize and stays shiny silver!

#6125 1 lb. (Approx. 23 ft.)

Canfield Low-Temp Solder

Canfield's exclusive solder is specifically recommended for soldering Bright Hobby Came because of its very low melting point! The lead-free and high tin content solder remains bright and shiny. 1/2 lb. spool.

#C3169

Lead Cutter

Sharp, flush cutting jaws make razor sharp cuts through lead came. Faster and easier than using a lead knife for smaller came sizes. Ideal for making leaded window ornaments and suncatchers.

#6513

Great for use with our PRE-CUT Ring Kits on page 42!
