

Specialty Tools

Glass Station

Hold everything on this one 14" long organizer! The sturdy molded tray will hold 4 rolls of copper foil, a pound of solder, a spill-proof flux bottle and brush, all your hand tools and cutters - even a soldering iron in the heavy coiled metal stand! Recessed handles allow you to pick up your whole work area in two hands! Everyone working with stained glass could use one!

#6501

Glazing Hammer

Designed with hard plastic and soft rubber faces for tapping glass in place when working with lead came. Rubber cushioned handle, 10" long.

#3054

Glass Cutting Squares

Glass cutting can only be as straight as your score! Assure a perfect right angle score with these heavy plastic resin squares.

#3360 12" Long Square
#3368 18" Long Square

Aluminum Mitre Box and Saw

Easily cut perfect corners in zinc and lead came, wood moldings, and other difficult materials with this precision aluminum mitre box and razor-sharp hacksaw. Fine tooth saw blade is replaceable.

#3226 Mitre Box
#3101 Mitre Saw
#3109 Replacement Blade

18" Long Straight Edge

Heavy aluminum with cork backing, for non-slip scoring of straight lines on glass.

#3318

Glass Station

The Rulex will be the most versatile tool on your workbench! 16" long adjustable square for scoring glass, drawing and framing. Securely locks any angle up to 135° with built-in allen wrench.

#6501

Trace Your Patterns With the Port-A-Trace

Finally, an inexpensive and compact light box for tracing patterns, selecting glass colors, or as a lighted scoring table! Translucent 10" x 12" white plastic top and a bright fluorescent bulb. The portable Light Tracer is strong enough to draw and score glass on. Box is made of stainless steel. Made in USA. One year warranty.

#1021

Glazar Strip and Circle Cutter

This amazing combination tool cuts strips, rectangles and squares from 1/2" to 12" wide, as well as perfect circles from 3" to 24" in diameter! The most accurate way to score long, narrow repetitive strips for window borders, jewelry box sides, and lamp gridwork. Includes a replaceable 6-wheel steel cutter turret and complete instructions.

#4300

6-Steel Wheel Replacement Turret

#3030R

Lens Cutter for Circles As Small As 1/2"

Ideal for cutting glass circles from 5" dia. to as small as 1/2" dia. Features numbered rod for easy adjustment, and a replaceable 3-wheel cutter turret.

#369

3-Wheel Replacement Turret

#369R

g2 Bottle Cutter

With the 'g2' bottle cutter you can: cut wide-mouth jars and bottles up to 5 gallons; remove the glass cutter for straight cuts on glass; cut more bottles with 6 durable cutting blades; cut with ease and comfort! Have better cutting control, taking less pressure to make a good score. Feel good about using a bottle cutter made from recycled aluminum.

#3365

Bottle Art

Who doesn't have glass bottles that can't be rinsed and recycled into new art objects? Color photos and detailed instructions for using a bottle cutter, paint, wire and found objects to create artistic objects from common bottles! Ideas include vases, terrariums, tableware, wind chimes, suncatchers, jewelry and more.

#7126

Recycle Glass Bottles

Sturdy metal cutting jig lets you accurately score bottles or jars by rotating horizontally. Then heat the score over the enclosed candle and cool with an ice cube. The result will amaze you - with practice you'll have a clean break each time! Also includes silicon carbide powder and emery cloth for polishing cut edges, and 3 cutting wheels.

#366

The Score 1® Glass Cutter

Easy as turning a dial to score any pattern shape, even while sitting down! Compact 4" x 7" x 7" size enables the Score 1 to be used anywhere. Perfect for anyone who has difficulty applying enough pressure to score glass with conventional glass cutters. Work faster and more relaxed, with less glass waste. Long lasting, Toyo carbide wheel. Shipped assembled with instructions.
