

Glass Jewelry

Innovative Adornments

Jayne Persico introduces you to fused glass and wire wrapped jewelry. Over 250 full color photos show you how to cut and fuse glass cabochons (medallions) and how to work with gold, silver and copper wire. The result is striking, contemporary jewelry pendants, watchbands, bracelets, rings and earrings.

#7107

Simply Soldered

There is more to soldering than just stained glass lamps! Step-by-step color photos show you how to create fun jewelry pins, bracelets and necklaces, picture frames, pendants and other 'pretty little things'!

#7153

Simply Fused

The microwave kilns are HOT — and this book will give you the best tips and techniques for using these kilns. Simple but attractive projects include dichroic cabinet pulls, jewelry pins, bottle stoppers, bracelets, earrings, necklaces and more!

#7808-F

Fuse in a Flash!

Fuse glass in your microwave oven in minutes not hours! Ceramic fiber kiln is perfect for fused glass jewelry, glass tiles and as a test kiln for glass compatibility. The 4 1/2" diameter kiln interior can reach 1650°F - **HOT!** Use with a minimum 1000 watt microwave with metal interior. See *Simply Fused* book (#7808) for microwave fused glass projects.

#JKMICRO

As a safety precaution, thoroughly clean your microwave oven after using the microwave kilns.

DTI Microwave Fusing Kin Package

Everything included to start glass fusing today! 3" inside diameter kiln goes right into a standard microwave oven. Package includes assorted glass pieces including dichroic, confetti, glass cutter, kiln paper, jewelry findings, hot mitts and instructions. See *Simply Fused* book (#7808) for fused glass projects.
