

# Fusible Bullseye 90 COE Glass

**B**ullseye thin glass for fusing and hot-glass arts. It is factory tested for fusing compatibility with a COE of 90. While looking similar to their standard stained glass, 'Tested Compatible' Bullseye Glass is specifically formulated for devitrification resistance & superior stability when fusing or slumping.

## Thin Bullseye 90 COE Mini Glass Packs

Introductory assortments of *THIN* Bullseye Glass for your glass jewelry and other small fusing projects. Eight assorted colors cut to approx. 4" x 5" in size in either Bullseye transparent or opal colors.

**#BMGT** Thin Transparent Pack  
**#BMGO** Thin Opal Pack

## Frit Sifter/Sorter Set

Make your own glass frit from any color glass! Set of four 6" dia. stainless steel sorting screens inside 6" tall containers. Sift your glass frit down four sizes to a fine .20 mm mesh powder.

**#4SIFT**

## Make Your Own Glass Frit!

Heavy 3-1/2" Dia. steel cylinder with 10" long plunger will easily make frit out of any glass! The unique chopping blade works quickly to pulverize compatible scrap glass and rods. Make as much frit as you want in any color you need! Use the sifter/sorter set (**#4SIFT**) to separate your various frit sizes. (We recommend wearing a dust mask when chopping glass.)
